
I've suffered from Plantar Fasciitis for several years and any yard work or extended standing resulted in burning pain in my feet. After Dr. Tripp's first treatment I felt immediate relief in that I was able to do yard work with minimal discomfort afterwards. After the second treatment (she was a bit more aggressive with pressure points) I was able to play ball with my son the next day and felt great afterwards that was several months ago and I continue to feel great. I enjoyed her professional approach and her desire to educate her patients as to the cause and proper treatment of their conditions. I have recommended Dr. Tripp to many friends and family. *David M -*
